10 Overvalued Stocks to Avoid RIGHT NOW!

These stocks are headed for big-trouble – if you own any, sell them now

by Jim Pearce and the IDEAL Team at Investing Daily's *Personal Finance*

We're currently facing a two-tier stock market that will continue for the foreseeable future. Tier 1 includes grossly overvalued stocks that are highly vulnerable to a sharp sell-off. These are the portfolio killers that you want to avoid. Tier 2 is comprised of unfairly undervalued companies with ample growth – those were covered in the "10 Undervalued Report" that you received.

Below are 10 soon-to-be losers (including some popular, highly publicized stocks) that don't make the cut when subjected to the analysis of The IDEAL Stock-Rating System. *Never forget:* Buying or owning overvalued stocks is probably the most common way investors sabotage their own portfolios.

IMPORTANT NOTES:

Guidance concerning the stocks highlighted in this report is believed to be accurate and represent our best advice at the time of writing. However, market conditions change constantly and guidance at the time of this writing may not reflect our latest advice. For our current take on any stock in this report, it is vitally important that you check the Portfolio tables on the website and confirm that the stock still earns a buy rating. Furthermore, confirm that the stock trades below our current buy limit. Do not buy any stocks above our recommended buy limits. If a stock's price exceeds our buy limit, wait for a pullback or invest in another Portfolio holding that trades below our buy limit. Any advice in the Portfolio tables, a recent issue of the publication, or our email alerts always trumps older advice in this special report. We reserve the right to substitute special reports as market trends dictate.
